## **DETAILED ACTION**

### **Allowable Subject Matter**

**Claims 1-13 are allowed.**

The following is an examiner's statement of reasons for allowance:

The examiner believes the resonant drive system to drive a toothbrush including a circuit for changing the drive frequency to produce a predetermined regularly varying drive frequency relative to a center frequency to produce a regularly varying amplitude of the brush head portion and all of the other claimed features set forth in the independent claim of the present invention to be patentable in view of the best prior art of record. None of the prior art references when cited separately or together discloses these features as claimed.

**Regarding claim 1**, the closest prior art **Greze et al. (US 6,918,300)** disclose a system for resonantly driving a power toothbrush having a resonant frequency, wherein a brush head portion of the toothbrush moves in operation through a path with an amplitude about a center point, comprising a resonant drive system for driving a brush head **(22, Fig. 1)** at a drive frequency, the drive system including a circuit **(14, Fig. 1 see also col. 3, lines 52-61)** for changing the drive frequency relative to the center frequency to produce a periodic change of amplitude of the brush head portion **(col.4 ,lines 50-60)** to a desired amplitude.

However, Greze et al. fail to disclose the drive system including a circuit for changing the drive frequency to produce a predetermined regularly varying drive frequency relative to a center frequency to produce a regularly varying amplitude of the brush head portion.

**Claims 2-13** are considered allowable as a result of being dependent on an allowable independent claim.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
